

Wellpoint Dewatering

Wellpoint dewatering is a specialist activity supplied by National Pump & Energy (NPE) to enable excavation below the natural water table or where excessive ground water is an issue.

The team at National Pump & Energy (NPE) has significant experience offering water management services to a range of civil and general construction projects throughout Australia.

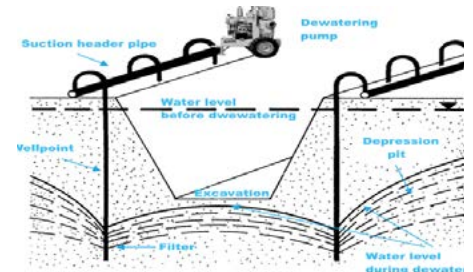

Wellpoint dewatering is often the most cost and performance effective solution for construction sites requiring relatively shallow excavation.

The expert wellpoint dewatering team at NPE provides turnkey solutions for every site, covering everything from initial site assessment, concept design and construction, supply and rental of all the necessary equipment, water treatment, installation of wellpoints and the ongoing management and maintenance of systems.

Wellpoint dewatering is the perfect solution for:

- High rise constructions
- Basement and building works
- Pipeline projects
- Below ground tanks and pools
- Water infrastructure projects and pipe repairs

NPE has a huge range of wellpoint dewatering equipment available, with all equipment in stock, ready to deploy to your site.
