

# OUR SERVICES

Wallacia

At NPE, we offer high-quality pump equipment for bypass works, including silenced diesel units and electric submersible pumps, ensuring effective performance.

As a leader in the water and wastewater industry, we specialise in bypass systems that maintain sewer operations during repairs. We collaborate with clients for detailed project reviews, including flow gauging and risk analysis.

## Water Treatment and Environmental Management

Our services include site surveys, sampling, monitoring, remediation, training and environmental management. NPE can provide assistance in project design and management, including risk management and the auditing, monitoring and assessment of environmental assets.

Our total water management processes are continuously improving as we develop new industry-leading water table management methodologies and technology.

Our national team is experienced in guiding project managers through the complex array of compliance requirements to meet specific project outcomes and comply with all relevant legislation. NPE Environmental services are bolstered by a series of strategic alliances with leaders in the environmental field.

- Composting and Soil Amendment

# OUR SERVICES

Penrith

## Dewatering

NPE provides comprehensive dewatering services for the civil, construction, and mining industries across Australia. We offer turn-key solutions for projects of all sizes, managing your site's water needs with expertise.

Our end-to-end project management includes tailored dewatering management plans, obtaining licenses, risk management, and the installation and operation of various dewatering systems. We ensure compliance with environmental laws through detailed reporting for local, state, and federal governments.

Having designed, drilled, and installed numerous dewatering systems, we specialize in:

- Wellpoint dewatering
- Sump dewatering
- Deep well dewatering
- Open pit dewatering
- Horizontal dewatering

## Bypass

At NPE, we provide top-quality pump equipment for bypass works, including silenced diesel-driven units and electric submersible pumps. Our expertise ensures effective performance every time.

As a leading provider in the water and wastewater industry, NPE specializes in bypass systems that maintain sewer service operations during repairs. We conduct detailed project reviews and collaborate closely with clients to address all aspects, including flow gauging and risk analysis.

We prepare pump system duty reviews and flow management plans that meet Shire or Council requirements. Our sewer bypass systems feature online telemetry and SMS alerts to a 24/7 monitoring team, ensuring immediate response and resolution of unexpected issues.

## Flood & Disaster Management

At NPE, we provide fast and reliable solutions for disaster management. With our experienced team and extensive equipment fleet, we ensure efficient and effective responses to emergencies. We eliminate the need for you to purchase and maintain expensive equipment that may sit idle. Our wide range of high flow pumping equipment and generators, supported by our technical expertise, guarantees optimal solutions for your situation. Trust NPE to be your flood and disaster management experts.
