

This document gives a complete list of technical data with some detailed explanations of the main systems, subsystems and performance of our generators, in order to support local sales documentation, tenders or even technical doubts.

While every effort has been made to ensure that the information in this manual is correct Atlas Copco does not assume responsibility for possible errors. Atlas Copco reserves the right to make changes without prior notice.

Standard Model Scope

Applying insights gained from industrial customers, rental companies, public utilities and other end users QAS generators are designed to withstand the most demanding on-site conditions and environments.

Considering their impressive performance at full capacity, the QAS line of generators includes excellent features for noise reduction and environmental protection.

QAS generators are purpose built for quick, easy and safe transport and on-site handling. Built to last, a QAS generator will provide years of dependable service for your electrical power generation needs. All members of the widely appreciated QAS family are intelligent multi-task units managing to power a wide range of electrical equipment in different applications.

Their superior component configuration offers a wide range of control modules, electrical settings and mechanical options, in order to guarantee superior quality at efficient operating costs.

Conceived for 100% prime power operation in the most severe outdoor conditions, ready to work in sensitive areas, QAS generators are designed and configured for safe operation with minimal downtime under any circumstance.

Features

- Carefully selected components, accurately developed and tested configuration
- Superior standard configuration and extensive option list
- 500 hours service interval and superior accessibility to all service points
- Compact and safe concept and sturdy design
- Designed and built to last

Benefits

- Accurate and stable power regardless of the conditions
- Ability to power a wide range of applications
- Service efficiency: increased up-time
- Increased transport efficiency
- Superior resale value / longer life time

Manufacturing and Environmental Standards

The QAS range is manufactured following stringent ISO 9001 regulations, and by a fully implemented Environmental Management System fulfilling ISO 14001 requirements.

Attention has been given to ensure minimum negative impact to the environment. The QAS range complies with the latest noise emission directives.

Declaration of Conformity

Our QAS EC falls under the provisions of the article 12.2 of the EC Directive 2005/42/EC on the approximation of the laws of the Member States relating to machinery, is in conformity with, the relevant Essential Health and Safety Requirements of this directive:

MACHINERY SAFETY (2006/42/EC): EN ISO 12100-1, EN ISO 12100-2, UNE EN 12601

ELECTROMAGNETIC COMPATIBILITY (2004/108/EC): EN 61000-6-5, EN 61000-6-4

LOW VOLTAGE EQUIPMENT (2006/95/EC): EN 60034, EN60204-1, EN 60439

OUTDOOR NOISE EMISSION (2000/14/EC): ISO 3744

ISO 8528: QAS generators are design to comply with ISO 8528 regulation

Time sustained short-circuit current	s	20	
AVR			
Model		R 220	
Sensing		1 phase	
Voltage regulation	%	±0.5	
Voltage sensing	V	≤140	

The Leroy Somer LSA alternators are designed for heavy duty continuous applications:

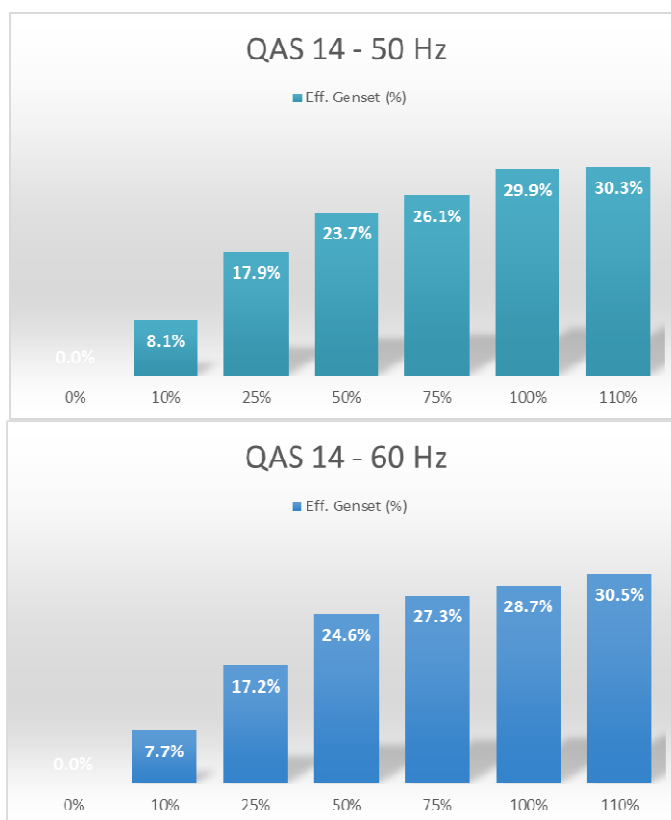

- System 2 protection (relative humidity >95%) for tropical environment (except coastal areas). With high performance dielectric varnish and reinforced over-coating on main stator and rotor
- 4 pole brushless design with single bearing, Class H insulation and IP23 rating
- Voltage regulation +/- 0.5%
- Full Load acceptance of prime power rating
- Standard excitation system is SHUNT (Self excited). As option (check Electrical options) you can have additional excitation system as:
 - PMG
 - Auxiliary winding

7. Options

		QAS 14 Kd	
		rpm	
		1500	1800
Mechanical Options			
Special Equipment			
Spark arrestor			OP
Material			S235 JR G2
Inlet shutdown valve			NA
Design pressure	bar		
Max/Min Temperature	°C		

Spark arrestor is a device that is designed to trap any exhaust particles or combustible materials, such as sparks or other flaming debris, from escaping into hazardous areas where they might cause fires. Exhaust particles are centrifuged in the spark arrestor, then collected and stored in a reservoir until emptied by an operator. An air shut-off valve serves to stop the engine by closing the air intake once the controller detects an over speed in the engine.

Fuel System			
External fuel tank connection			OP
Material			Brass 0011 5204 03
Test pressure	bar		1
Overpressure	bar		2
Open pressure	bar		1±0,1
Max/Min Temperature	°C		-30 to +80
External fuel tank connection with quick coupling			OP

The EFT enable the generator to run for long periods of time on an external fuel supply without having to refuel. We can also provide quick couplings to enable easy and fast connection to the fuel tank

AFT Automatic fuel transfer			NA
Additional fuel filter			STD
Design pressure	bar		
Test pressure	bar		
Volume	l		
Max/Min Temperature	°C		
Max flow rate	g/h		
Skid fuel tank (long autonomy)			NA
Capacity	l		
Material			
Fuel level sender (*Changes automatically for different fuel tank)			STD
Oil level maintainer			NA
Capacity of oil tank			-
Cold start synthetic first oil filling			OP
Type			PAROIL Extra
Temperature (min / max)	°C		-15 to 40°C
Density (Ambient temperature)	g / cc		0,86 (15°C)
Cold flow			Antifreeze fuel additives in 0,2% composition

QAS 14 Kd ESF - Product Reference

		QAS 14 Kd	
		1500	1800
	rpm		
Mechanical Options			
Undercarriage option			
Undercarriage adjustable towbar with brakes		OP	
Number of axles		1	
Permissible mass on each axle		1300	
Maximum speed		140	
Dimensions (L x W x H)		3370 x 1400 x 1722	
Brake connections		Mechanical	
Wheel		14"	
Loose ball coupling		OP	
Adapter 24V road signalization		OP	
Towing eye			
Towing eye DIN		OP	
Towing eye NATO		OP	
Towing eye BALL coupling		OP	
Towing eye ITA		OP	
Towing eye AFR		OP	

Depending on the size, units have a two-wheeled, single axle trailer, or a double axel with 4 wheels. Both types of trailer have an adjustable towbar and road signalization.

Special options

Special color undercarriage		OP
Special color wheels		OP
Special color canopy		OP
Special color frame		OP
Witness test		OP

Guided and face to face testing of the machine. Including Transient test and Heat Run Test.

Electrical Options

		QAS 14 Kd
Coolant Heater		
Electric driven coolant heater		OP
Voltage	V	240
Power	kW	1
Current	A	4.2
Thermostat Range	°C	38 / 49
Fuel driven coolant heater		NA
Electrical power	W	
Rated voltage	V	
Operating pressure	bar	
Flow rate at 0,1 bar	l/h	

Its main mission is heat the coolant so that the temperature of the engine is always high enough to start straight away, even in temperatures as low as minus 25 degrees Celsius. Not for all models but a fuel powered version is available, which is ideal for remote areas without mains supply.

Frequency and Voltage configuration

Frequency/Voltage/Phases	50 Hz / 400V / 3ph	STD
Dual frequency switch	50Hz-60Hz	OP
*If the unit is dual frequency, DV and MV versions are NA		
Dedicated frequency	50 Hz 230V 1ph	OP
Dual voltage	50 Hz 400 V 3ph - 230V 3ph (Norway)	OP
Dual voltage	50 Hz 400 3ph - 230V 1ph	OP

QAS 14 Kd

	rpm	1500	1800
Electrical Options			
Battery			
Battery charger*		OP	
Temperature	°C	-30 to 55	
Input frequency	Hz	47.....64	
Output voltage	V	12	
Output current	A	5	
Output power	W	60	
Dimensions (L x W x H)	mm	165 x 305 x 110	
<i>Recommendable with Qc2103 and Qc4003</i>			
Battery cut off switch		OP	
Operations	V / A	24 / 1500	

Battery charger is necessary for stand-by applications because the controller is always on, ready to start at any time. Battery cut off switch allows the battery to be disconnected when storing the unit, thus preventing the battery from becoming drained.

Electronic speed regulator (Governor)		STD	
Model			
Connection to engine			
Sensors/Switch	°C and kPa		

Earth Protection			
Neutral TNS		STD	
Neutral EDF (TT)		OP	
Neutral IT		OP	
Earth leakage detection Relay (ELR)		OP	
	mA	30	
Insulation Monitoring Relay		OP	
Earth PIN		STD	
Length	mm	450	

Alternator excitation system			
Permanent magnet (PMG)		NA	
AVR			
Sustained short-circuit current	%		
Time sustained short-circuit current	s		
Operating temperature	°C		
No load voltage	V		
Stator Phase/Phase resistance (20°C)	Ω		
Auxiliary winding		OP	
AVR		R438	
Sustained short-circuit current	%	300% (3x In)	
Time sustained short-circuit current	s	10	

The PMG or Permanent Magnet Generator is a separate device to power the AVR and is ideal for motor starting and distorted loads as provides the generator 3 times its nominal current during 10 seconds. Auxiliary winding system is an extra winding layer in the alternator that provides same benefits than the PMG.

Controllers			
Qc1103		STD	
Qc2103		OP	
Qc4003*		NA	

*with Qc4003+ PMS Atlas Copco recommends: Battery charger + Coolant heater

*Just 1 ph socket available

*Qc4003 includes always communication cables and needed adaptors

Qc1103: is the controller dedicated for island operation or remote start

Qc2103: has in addition the possibility of detect a mains failure

Qc4003: is the high spec controller prepared to work synchronized with several units (IPP) and/or the mains

CONTROLLERS KEY FEATURES QC 1103 & 2103 CONTROLLERS

Auto start or automatic mains failure applications

Monitoring of electronic or non-electronic engines
J1939 as standard

Gen-set and busbar control & protection

Improved inputs/outputs
Up to 11 digital inputs, 5 analogue inputs and 8 relay outputs

Modbus communication rs485

Configurable for other applications
PARUS configurable

Graphical display
Multi-language

CONTROLLERS KEY FEATURES QC 4003 CONTROLLER

Controllers key features Qc 4003

Paralleling between generators and mains power supply

Full engine monitoring
CAN communication J1939

Gen-set and busbar control & protection

Multiple configurable inputs/outputs

Modbus communication RTU/RS485

Easy software with m-logic programation
PARUS 3

PARALLELING APPLICATIONS

Load Take Over, Mains Export/Import, AMF, Peak Shaving, Transformer Maintenance, Fix power and PMS (CAN)
